- B) 18t@ 3s\$
- C) 18t# 3s%
- D) 16t# 3s\$
- E) Cannot be determined

View Answer

Option C

Solution:

Symbol is according to number of letters in word

4 – #, 5 – @, 6 – \$, 7 – %

Number is = (number represented by first letter of word) + 2

Letter – last letter of word

So Profile – P = 16, $16 + 2 = 18$, 7 letter word so % and last letter e – so code is 18e%

2. What is the code for 'Green Signal'?

& for first letter s, % for first letter p, @ for first letter a, and ! for first letter h

Number represents number of alphabets in word divided by 2. And if it comes in decimal, the number is rounded off. Example crucial = $7 = 7/2 = 4$. sour = $4 = 4/2 = 2$
Alphabet represents the last letter of word.

So Passive = % for P, e for last letter e and 4 for passive = $7 = 7/2 = 4$

Option D

Explanation:

Observe all numbers are multiple of 3.

Number: (Number of letters in word – 1) * 3

Observe 4 symbols are used and there are words ending in 4 letters only – u , r, d, i

So d – #, a – @, s – %, k – \$

Alphabet: first letter of word – 2.

So

Civilized will be coded as:

C – C-2 => A, last letter d => #, and number of letters in 9 so $(9-1) * 3 = 24$

So A#24

Symbols are according to last letter in words:

g – #, k – %, l – \$, m – @

Number represents double the number of letters in words

Alphabet represents the next letter in alphabetical series to first letter of word.

So superstring — # for last letter g, 22 for 2*11 (11 letters in superstring), and T for next letter to s

So superstring – #22T

- B) v@18 c#7
- C) u@18 d#7
- D) v@19 b#7

View Answer

Option D

Solution:

There are only 2 symbols in the above coding. They have been set according to first letter of word. Words having numerical value less than equal to 13 are kept in one group and are denoted by #. and from 14-26 by @. (i.e. for first half letter (a-m) – #, and for last 13 letters (n-z) – @

Number represents the numerical value of first letter

Alphabet represents the reverse **of last letter** according to their number in alphabetical series, a = 26, b = 25,z = 1

So letter – r -> i, # for l and 12 for l

So letter – i#12

- A) \$j4 !z4
- B) \$k4 !z4
- C) %k4 !y4
- D) #k4 !z4
- E) Cannot be determined

View Answer**Option B****Solution:**

Symbols are last letter

e – %, k – #, c – !, m – \$

Number represents number of alphabets in word divided by 2. And if it comes in decimal, the number is rounded off to previous integer. Example example = $7 = 7/2 = 3$.

hijack = $6 = 6/2 = 3$

Alphabet represents the reverse of first letter.

So example – % for last letter e, reverse of e is v and 7 letter word, $7/2 = 3$

So example – %v3

- A) H#15 J#3
- B) G@15 J%3
- C) G@15 J\$3
- D) G#15 J%3
- E) None of these

View Answer**Option D****Explanation:**

There are 4 symbol, and observe that each line contains 4 words, one each ending with either t or e or k or n

In 1st line — There are 2 codes with 11 in it and 2 words starting with I, I = 9, 9+2 = 11, check if that makes sense in other words also. It makes O = 15, 15+2 = 17, which is in E\$17

So with this get the symbol and number.

t – \$, e – #, k – @, n – %

Next letter:

There are two E's in 1st line, 1 each in 2nd and 3rd lines of code. also 2 words with 5 letters in 1st line, and 1 each in 2nd and 3rd line, and E = 5. Check with others.

So Indefinite – end with e so #, I = 9, 9+2 = 11, and 10 letter word, J = 10

So Indefinite – J#11

- A) T2# G5@
B) T1\$ G5@
C) T1# H5@

E) None of these

Option C

Explanation:

In 2nd and 4th code there are 2 codes with % and \$ respectively. And also there are 2 words with 6 and 4 letters in these respectively. So by this it can be found that symbols are used for no. of letters

Symbols for number of letters:

4 – \$, 5 – #, 6 – %, 7 – @

For letters: Reverse in English Alphabet

For numbers – see that each lines of code contains 1 code with 5 digit

– K5@, V5%, H5\$, T5\$. So find relation between words to find the pattern

There is one word in each line having 'e' letter at last of word. and e is 5. Check for others too if it works. So you get is that the last digits of number of last letter are added to obtain number in coding.

So Puzzles – P -> K, S = 19, 1+9=10 = 1+0 = 1 and 7 letters in word so @

So Puzzles – K1@

Explanation:

Observe the numbers. They all are divisible by 4.

Number which represents first letter * 4.

Symbol is according to last letter of word:

D to %, N – ©, R – @, E – #, M – \$

letters are only A, B, C, D, and E. They are according to number of letters in each word:

5 – A, 6 – B, 7 – C, 8 – D, 9 – E

Example: INCIDENCE

I = 9, so $9 \times 4 = 36$

last letter E so #

Number of letters in incidence = 9, so E

So incidence is coded as – 36#E

- B) T16 U35
- C) A19 T16
- D) O19 T16
- E) None of these

View Answer

Option C

Find – T16

Girl is not present anywhere in codes and so is A19

2. Which of the following can be used to find out the code for 'box'?

- (i) S22 K21 P15 U38
- (ii) N20 S22 K67 U35
- (iii) V20 K21 K67 P15
- (iv) N20 P20 L31 U35
- A) (ii)
- B) (ii) or (iv)
- C) (ii) or (iii)
- D) (i) or (ii)
- E) None of these

View Answer

Option C

Explanation:

From 1- code, search – K21 and find – T16

So 'box' is either S22 or P15 so if given that what codes (ii) and (iii) stand for, the code for 'box' can be found. [because they contain either S22 or P15

in (i) both are given, so cannot be found. In (iv) – neither is given so cant be found

So either (ii) or (iii) can be used

3. Which of the following cannot be used to find the code for 'command'?

- A) N20 S22 K67 U35
- B) S17 K21 E25 P15
- C) S22 E25 P15 U38

- D) N20 P20 L31 S17
E) None of these

View Answer

Option B

Command can be S17 or E25 or U35. But B) contains both S17 and E25

4. If 'first' is coded as 'L31', then what text be the code for 'not form'
A) N20 K21
B) U35 N20
C) O19 N20
D) N20 S22
E) F34 N20

View Answer

Option B

In 'Find is first form' is written as 'L31 N20 R19 T16'.

Find – T16, is – R19. Now if first – L31, then form – N20.

Now in 'Search text not command' is written as 'S17 E25 K21 U35'

Search – K21, so A cannot be the answer.

not can be S17 or E25 or U35, none of which is present in B, C or D. In B U35 is there.

So B) text be the code.

5. If the code for 'looking' is 'F34', then which of the following can be used to find the code for 'good'?
A) O19 E15 K21 P15
B) S17 O19 R19 E15
C) O19 P15 F34 E15
D) L31 U35 E15 P15
E) None of these

View Answer

Option D

'is' – R19. So if 'looking' is R34, then 'good' can be coded as O19 or E15.

Only in D option, one of them is written. In other options both O19 and E15 are written so will not be useful to find the code for 'good'.
